

## Il controllo del territorio: tecniche operative ed investigative. Laboratori e simulazioni

### *Il software FAST (progetto Fakecare)*

**Andrea Di Nicola**

Coordinatore scientifico di eCrime, Università degli Studi di Trento

# FAST

Identifica automaticamente le farmacie online illegali.

- *Dato di ingresso*

Indirizzo (**URL**) di una farmacia online  
(es. [www.myfavouredpharmacy.com](http://www.myfavouredpharmacy.com)).

- *Output*

**Indice di rischio** della farmacia online che va da **0** (minimo rischio illegalità) a **100** (massimo rischio illegalità).

Una farmacia è considerata dal software illegale se l'indice è superiore a **50**.

# Come funziona

Per costruire l'indice di rischio combina due caratteristiche del sito:

- **Contenuto testuale;**
- **Link verso altri siti.**

RISK INDEX  
0% - 100%

# Classificare manualmente una farmacia
